DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

37-39 Main Street is a brick and frame commercial structure facing the street to the west; it dates from ca. 1900. Five bays in length, two stories in height, its street front is stuccoed and a one-story display window projects forward beneath a low pitched hip roof across the southerly four bays. Above the 6/6 second story windows the large cornice projects above the nearly-flat roof and it is supported by scrolled modillions grouped between similar brackets which mark each bay.

The brick structure is three bays in depth and another four bays extend the structure to the east; the first story walls of this easterly section are recessed behind the plane of the frame second story walls.

Within are large spaces for merchandising and storage. The front section has oiled wood floors and wainscotted walls; the second floor is supported by two rows of wood columns and beams. An open stair gives access to the second floor on the north side; its moulded rail is supported by square paneled newels and turned balusters rising above a closed string. The rear section is the warehouse, its circular sawn framing joined with mortise and tenon. Approximately centered in the rear section, immediately adjacent to the brick section is the hoisting mechanism of a hand-powered lift; above a large trap door in the second floor is a large iron and wood wheel, iron gears and a large axle-spool.

Falling grade allows a basement or ground story beneath the rear portion of this structure and the front portion is unexcavated save for a space for a former floor furnace and an access trench to it. The first floor framing is all circular sawn, supported by stone foundations and piers.
